PUBLIC HEARING

concerning

Notice of Application for Renewal of Waste Discharge Requirements
(National Pollution Discharge Elimination System Permit
for

**THE BOEING COMPANY
SOUTHERN GROUNDWATER STUDY AREA EXTRACTION
AND TREATMENT SYSTEM
SACRAMENTO COUNTY**

The Boeing Company is permitted to operate two interim groundwater extraction and treatment systems to control the leading edge of a two plumes of polluted groundwater containing trichloroethylene (TCE) and/or perchlorate emanating from the Inactive Rancho Cordova Test Site (IRCTS) in eastern Sacramento County. The permit for the systems was adopted in March 2005 and allows discharge to Morrison Creek, to recharge via an injection well and for use for dust control and construction purposes at a housing development south of Douglas Road. Following discussions with the United States Fish and Wildlife Service and the United States Army Corps of Engineers, it was determined that it was preferred to have a single discharge to Morrison Creek instead of one from each facility. Thus, the permit is proposed for revision to allow all treatment to be at single treatment plant with a single discharge to Morrison Creek. The water is also proposed for reuse for construction of development and sand and gravel mining operations on the IRC TS property.

An **informal** public hearing concerning this matter will be held during the Regional Board meeting which is scheduled for:
